03 Document Reference Log - Creation

Generate New Document Reference No.

1. Click on the “+” button to obtain a new reference no.

 **AEON Document Log** Log Sheet Staff Records Account Management Configuration Terry Yang Sign Out

Document Reference Log + Year: 2026

Date	Name of Sender	Drafted By	Send To	Document Description	Remarks	Reference No.	Actions
10/07/2026	Kelvyn Kwok	Kelvyn Kwok	POAD	Sole Agent Letter for LRT (LN81)	-	ADA/KK/249/2026/kk	Edit

Rows per page: 10 1-1 of 1

2. Input the corresponding values on the dropdown and textbox and then click “” button to generate the new reference no.

Date	Name of Sender	Drafted By	Send To	Document Description	Remarks	Reference No.	Actions
13/07/202	-- Select --	-- Select --	Send To	Description	Optional	ADA/??/???/2026/??	 
10/07/2026	Abby Guan	Kelvyn Kwok	POAD	Sole Agent Letter for LRT (LN81)	-	ADA/KK/249/2026/kk	Edit

Rows per page: 10 1-1 of 1

03 Document Reference Log – Assignment Logic

Reference Number Format

ADA / KK / 249 / 2026 / kk

ADA	Prefix (from Configuration)
MB	Sender's Initial (uppercase)
001	Sequence No. (auto-incremented)
2026	Year
pc	Drafter's Initial (lowercase)

Sequence Logic

- Sequence is grouped by Prefix + Year
- Resets to 001 at the start of each new year
- Based on the sequence column in the database, not the reference text
- Year filter dropdown shows all years with existing records

+

Year:

2026

▼

Reference No.	Actions
ADA/KK/249/2026/kk	Edit

04 Staff Records

Features

Quick Search

Filter by Name, Initial, Staff No, or Email instantly as you type

Status Filter

Toggle between Active, Inactive, or All staff records

Add / Edit Staff

Admin users can add new staff or edit existing records

Download Template

Download a CSV template for bulk staff import

Import

Upload a CSV file to bulk-create staff records with validation

Staff Fields

Name	Required	Full name, must be unique
Initial	Required	Short code (e.g. MB, TY)
Staff No	Optional	Employee number
Email	Required	Company email address

Duplicate Initial Warning

- A red warning message appears above the table when duplicate initials are found among active staff
- Example: "Duplicate Initial: TL: Tansy Lee, Timothy Lee"
- The Initial cells of affected staff are highlighted with a red background
- Resolve duplicates by editing the Initial field to ensure uniqueness

04 Staff Import (Admin Only)

CSV Template Format

Click "Download Template" to get a pre-formatted CSV file.

Name,Initial,Staff No,Email

John Doe,JD,S001,john.doe@example.com

Jane Smith,JS,S002,jane.smith@example.com

Mike Lee,ML,,mike.lee@example.com

How to Import

- 1 Click "Download Template" to get the CSV file
- 2 Fill in staff data following the template format
- 3 Save the file as CSV (.csv)
- 4 Click "Import" and select your CSV file
- 5 The system validates and imports valid records
- 6 Success/error counts are shown via toast notifications

Import Validation Rules

- ✓ Name, Initial, and Email are required for each row
- ✗ Duplicate names (vs existing active staff) are rejected
- ✗ Duplicate names within the same import file are rejected
- ✓ Partial success is supported - valid records import, invalid rows are skipped with error messages

05 Account Management (Admin Only)

Managing User Accounts

This page controls who has admin access to the application.

Add User

Click "+ Add User" and fill in Name, Email, and Role (Admin or User)

Edit User

Click "Edit" to modify a user's details or role

Deactivate

Click "Deactivate" to disable a user's access (confirmation required)

Reactivate

Inactive users appear in a separate section with a "Reactivate" button

Role Settings

Admin Role

Full access to all features including Staff Records management, Account Management, and Configuration.

User Role (View Only)

Can view Log Sheet and Staff Records, and create new reference numbers. Cannot edit records or access admin pages.

Important Notes

- Users must sign in via Microsoft SSO before they appear in the system
- Email must match the user's Microsoft account email
- Users not in Account Management default to "User" role

06 Configuration (Admin Only)

System Configuration

The Configuration page manages system-level settings used across the application.

Current Configuration Types:

PREFIX

The document reference prefix (e.g. "ADA")

This prefix is the first part of every reference number generated by the system. It appears as the first segment in the format:

ADA/MB/001/2026/pc

Available Actions

Add Configuration

Click "+ Add Configuration", select Type (PREFIX), enter Value, and save

Edit

Click "Edit" to modify an existing configuration value

Delete

Click "Delete" to remove a configuration entry (confirmation required)

Caution

Changing the PREFIX value will affect all new reference numbers generated after the change. Existing reference numbers will not be updated.

Thank You
